

REMARKS

Claims 9 and 10 have been amended to indicate the point of attachment of the -SO₂.

With respect to claim 13, the last species therein is supported by original claim 6 wherein the last compound 4-chlorol, hydrogen and pentyl and therefore this ground of rejection is not deemed proper. In the definition of R₃, there is now provided a bond between Z₃₂ and R₃₄.

Claim 10 has been amended to delete the repetition therein. Therefore, the modified claims are believed to properly define the invention and withdrawal of these grounds of rejection is requested.

Respectfully submitted,
Hedman and Costigan
